

Peer Review - by Maryann

Isabel: Throughout the project, Isabel executed her assigned deliverables while assisting with others. She took care of the recipe mining and helped design and implement the UI. I believe our UI is great and could not have been done without her. Also, she created the idea and implemented the hook page which is a great feature. Overall, she is an excellent coder, is quick, responsive, and helpful!

Nadia: Nadia was a great teammate for this project as well! Despite her having to wake up at 6am every morning for athletics, she continued to work late when needed. She never failed to get the job done. She handled accounts, recipe ratings, and cookbook excellently and also helped debug other people's code when we were working together. It was great working with Nadia and I would definitely work with her again!

Lily: Lily again was another excellent teammate and coder in our project. She was in charge of the Pantry and implemented the super cool autocomplete feature. Also, before we would submit our final version, Lily went through and thoroughly tested our app, trying to find a way to break it, so that we could fix any bugs that she uncovered. I couldn't be more impressed and satisfied with the work by Lily and all my other teammates in our project!
