

Peer Review - by Lily

Isabel: Isabel did an amazing job. She took on the implementation of the entire hook, which actually turned out to be one of the most code intensive aspects of our final version. She was also very receptive to feedback about bugs and fixed them incredibly quickly, ensuring that our app was very robust. She also put a ton of extra work into making the UI look beautiful even though it was technically not necessary.

Maryann: Maryann was also an incredible teammate. She always finished her work way ahead of time, which gave us ample time to make sure everything was running smoothly. For the final version, she easily integrated the new ingredient schema, ratings, and many other features with her original code and made sure the main function of our app, the recipe search, worked efficiently and flawlessly.

Nadia: Nadia was also a very efficient and hardworking team player, and she always got her work done very early as well. In the final version, she implemented the entire Cookbook feature as well as the ratings, which was no small task. Also, Nadia was always very quick to help other members even if their part of the project had little to do with her own, which definitely made a big difference.

Overall, I'm super proud of my team members for all the work we've done these past few weeks, and I couldn't have asked for a better team!
